

IEEE Geoscience and Remote Sensing Society 2014 Best Reviewers

The IEEE Geoscience and Remote Sensing Society journals [IEEE Transactions on Geoscience and Remote Sensing (TGRS), IEEE Geoscience and Remote Sensing Letters (GRSL), IEEE Journal of Selected Topics in Applied Earth Observations and Remote Sensing (JSTARS)] annually recognize their five best reviewers. This honor is bestowed in recognition of their outstanding service to the journals, both in terms of the technical excellence of the reviews performed and the timeliness with which they have been consistently provided. Anonymous peer reviewing is one of the cornerstones

of vigorous advancement in science and engineering research, but it is also often one of the most underappreciated of the many requests and demands made of subject experts. It is for this reason that the IEEE Geoscience and Remote Sensing Society is extremely grateful to these reviewers for the time, energy and dedication that they have devoted to the task of reviewing manuscripts. As always, coming to only five names for each journal was a difficult task – we have formed and excellent community of reviewers, but we finally came to the following list.
